Connect Your Previous Certification to Your New Account

The PC(USA) has a new data system for educator certification! This new system will allow you to enter your account at any time and make changes to your contact information. But first we need you to take some action. Please take these steps to get your account set up:

1. Go to https://educator-certification.pcusa.org/applicants/register/ and create an account using the prompts. You should receive an email confirmation.

2. Once the account is created, go to https://educator-certification.pcusa.org/ to log in using your username and password.

3. Under “Next Step,” click on the SECOND button labeled “Add Existing Certification.”

4. This will activate an email to notify the PCUSA Manager for Certification who will manually connect your certification information from our previous database.

5. After the information has been connected, the next time you log in to your account, you will be able to update any information and add information that was not being tracked in our previous system. **

6. You may return to this information at any time using your account information. We hope that you will keep your profile information current as it is valuable in tracking the certified educators of the PCUSA.

**Please note that the background demographic information is being collected in order to track the pattern of certified educators and will not be used for any other purpose.

Thank you for helping us keep our records up to date!
